1. **RISK FACTORS**

On page 13 of the Base Prospectus, the risk factor entitled “The coronavirus (COVID-19) pandemic and its economic consequences may adversely impact the Group’s operations, results and financial position” in the section entitled “Risk Factors Relating to the Issuer” is deleted and replaced as follows:

“The coronavirus (COVID-19) pandemic and its economic consequences may adversely impact the Group’s operations, results and financial position

The emergence of Covid-19 in late 2019 and rapid spread of the pandemic across globe have adversely impacted economic conditions in multiple business sectors, sparked a declined in the financial position of economic agents, while also disrupting the financial markets. In response, many affected countries have been forced to implement preventive health measures (closed borders, lockdown measures, restrictions on certain economic activities, etc.). In particular, the sudden recession gripping affected countries and the drop in global trade have had and will continue to have negative effects on global economic conditions for as long as global production, investments, supply chains and consumer spending are impacted, in turn impacting the business operations of the Group, its customers and its counterparties.

The resurgence of the virus in the fall led to new restrictions (including new lockdown measures in France and a number of European countries) and, after a rebound during the summer, the economic environment could deteriorate further. A virus that is still active could lead to the extension or repetition of restrictive measures, which could last several months, and thus adversely affect the Group's business, financial performance and results.

In response, massive fiscal measures and monetary policy initiatives have been undertaken to support activity. The French government, for example, has instituted a government-backed loan program for businesses and professionals, and set up partial unemployment measures along with other tax, social security and bill payment measures for individuals. For its part, the European Central Bank has made access to highly substantial refinancing operations more abundant and less expensive. Groupe BPCE has actively participated in the French government-backed loan program in the interest of financially supporting its customers and helping them overcome the effects of this crisis on their activities and income (e.g. automatic six-month deferral on loans to certain professional customers and micro-enterprises/SMEs).

There is no way to guarantee, however, that such measures will be enough to offset the negative impacts of the pandemic on the economy or to fully stabilize the financial markets over the long term. The economic environment may get worse before it starts to get better.

The lockdown measures taken in France, the Group’s main country of operation (76% of net exposures were located in France at 30 June 2020), have taken a major toll on the business of economic agents. The Group’s results and financial position are impacted by such measures, due to decreased income and a decline in the quality of assets both in general and in certain particularly hard-hit sectors. The sectors most likely to be impacted at this point in the Corporate and Professional Customers portfolio are Wholesale and Non-Food Retail Trade (gross exposure of €16.2 billion at 30 September 2020), Tourism-Hotels-Catering (gross exposure of €13.8 billion at 30 September 2020), Automotive (gross exposure of €9.8 billion at 30 September 2020) Consumer goods excluding cosmetics and personal care (gross exposure as of 30 September 2020 of 6.2 billion euros) and Real Estate Professionals excluding residential exposure (gross exposure of €4.9 billion at 30 September 2020). The Oil & Gas sector has been very significantly impacted by a sharp drop in demand brought on by the pandemic and by the initially uncoordinated supply-side action taken by most oil-producing countries (e.g. OPEC countries, Russia), causing the price of the barrel to plummet and sparking major price volatility (net EAD of €10.0 billion at 30 September 2020 for Natixis).

These circumstances are liable to significantly increase the Group’s cost of risk and the amount of provisions for credit risk. The impact in 2020 should, however, be mitigated by the government support plans in place for corporates and individuals.

Cost of risk amounted to €2,069 million for the first nine months 2020, i.e. 38 basis points (versus 18 basis points for the first nine months 2019). The increase in cost of risk can be attributed to the effect of the Covid-19 crisis in forward-looking information to estimate expected credit losses, as well as higher individual provisions concentrated in the energy and natural resources sector, and more specifically in oil
and gas (Corporate & Investment Banking perimeter). The method applied to impairment of credit risk and the assumptions made in the scenarios are described in § 1.5.2.1 “Impairment of credit risk” in the consolidated financial statements of Groupe BPCE included in the second amendment to the 2019 Universal Registration Document.

The Group’s results and financial position are and may continue to be affected by adverse financial market developments (extreme volatility, equity market and index slump, spread tensions, steep and unforeseen decline in dividends, etc.). Accordingly, the valuation of certain products was affected in the period by market illiquidity, particularly in Natixis’ Corporate and Investment Banking operations, which were exposed to the effects of the significant adjustment of valuation inputs such as the “dividend” component.

The deterioration of economic conditions and its impacts on the Group may increase the risk of seeing its external ratings downgraded. Furthermore, the French government’s ratings may end up being downgraded, due in large part to an increase in the national debt and public deficits. These factors could have a negative impact on the Group’s funding cost on the financial markets.

From a more general standpoint, the Covid-19 epidemic creates risk for Groupe BPCE in that (i) it has called for organizational changes (e.g. telework) liable to generate, potentially, operational risk, (ii) it has slowed trading on the money markets and may have an impact on liquidity supply; (iii) it has increased customer cash requirements, and thus the amounts loaned to customers to help them get through the crisis, (iv) it could bring about a rise in business failures, especially among more vulnerable companies or those operating in highly exposed sectors, and (v) it has triggered sudden shifts in the valuation of market assets, which may affect market activities or business investments.

Developments in the Covid-19 crisis (uncertainty over the duration, magnitude and future development of the pandemic, the implementation of new lockdown or restriction measures in the event of additional epidemic waves) are a major source of uncertainty, making it difficult to predict the overall impact on the Group’s main markets and on the global economy in general. At the date of filing of the Universal Registration Document, the impact of this situation, factoring in the aforementioned support measures, on Groupe BPCE’s businesses (retail banking, insurance, asset management, corporate and investment banking), results (mainly net banking income and cost of risk) and financial position (liquidity and solvency) is difficult to quantify.”
